# Capstone Project – Pre-Submission Document

**Maximum Length: 3 Pages**

Teams are required to submit a pre-submission document outlining their understanding of the assigned domain, proposed approach, and project execution plan.

The document should include the following:

**1. Business Problem Understanding and Objective Formulation**

- Demonstrate understanding of the assigned domain and business context.
- Identify the potential business problem(s) present in the dataset.
- Formulate the business objective(s) and analytical objective(s) that the team intends to address.

**2. Challenges and Constraints**

- Identify potential challenges associated with the problem, data, implementation, deployment, or business adoption.
- Discuss assumptions, limitations, and constraints that may impact the proposed solution.

**3. Background Study / Literature Review**

- Review relevant academic research, industry case studies, white papers, or existing solutions related to the problem domain.
- Summarize how similar problems have been approached and solved in industry or research.
- Highlight key techniques, methodologies, and best practices identified during the review.

**4. Proposed Methodology / Solution Approach**

- Describe the proposed analytical or machine learning approach.
- Explain the overall solution workflow.
- Include a workflow diagram, architecture diagram, process flow, block diagram, or implementation framework.
- Provide a brief explanation of how the proposed solution is expected to address the identified problem.

**5. Proposed Timeline**

- Present a project execution schedule covering major activities and milestones.
- Clearly indicate the planned timeline for data understanding, preprocessing, analysis, model development, evaluation, and reporting.

**6. Expected Deliverables / Outputs**

- List the expected project outputs and deliverables.
- Examples may include:
    - Data Analysis Report
    - Machine Learning Model(s)
    - Dashboard / Visualization
    - Business Recommendations
    - Final Presentation
    - Technical Documentation
    - Deployment Proposal

**Submission Requirements**

- Maximum Length: 3 Pages
- Font: Times New Roman / Calibri, Size 11 or 12
- Include figures, workflow diagrams, or block diagrams wherever applicable.
- The document should reflect the team's preliminary understanding and proposed direction; revisions may be made during project execution.
